PROJECTS

Advanced Malware Permission Analyzer | GitHub — Oct' 25 - Nov' 25

- Analyzed Android application permissions to understand common security risks and misuse patterns.
- Developed a desktop-based tool to inspect Android app permissions and identify suspicious combinations using rule-based logic.
- Strengthened practical knowledge of Android malware behavior while enhancing skills in security analysis and GUI-based tool development.

Tech: Java, Swing, Security Heuristics

CPU Scheduling Simulator | GitHub — Jan' 25 - Mar' 25

- Explored CPU scheduling concepts to understand how different algorithms influence process execution.
- Developed an interactive simulator to visually demonstrate FCFS, SJN, and Priority scheduling algorithms.
- Gained practical insight into operating system scheduling behaviour and performance trade-offs through real time simulation.

Tech: Algorithms, OS Concepts, Process Scheduling Logic, GUI Design, Data visualization, File Handling

Secure Cryptography Toolkit | Live — Dec' 25 - Jan' 26

- Developed and deployed a Secure Cryptography Toolkit featuring AES encryption/decryption, hashing, random key generation, and secure password generation via an intuitive GUI.
- Implemented cryptographic standards and key-derivation techniques and deployed it.

Tech: HTML, CSS, JavaScript, Web Crypto API (AES-GCM, PBKDF2), CryptoJS, Secure Deployment

TRAINING

CSE Pataskala | Verify — Jul' 25

C++ Programming OOPs and DSA

- Completed an intensive summer training program in C++, OOP, and DSA, maintaining full attendance, performing well in all tasks, and successfully clearing the final assessment.
- Built a menu-driven C++ application using core OOP principles and data structures like arrays, linked lists, and stacks, focusing on clean structure, input validation, and modular design.
- Strengthened my problem-solving mindset and ability to write efficient, well-organized C++ code, gaining confidence in applying OOP and DSA concepts to real programming tasks.

Tech: C++, OOPs concepts, Data Structure and Algorithm, Standard Template Library(STL), VS code, Git version control.

CERTIFICATES

- Cyber Job Simulation – Deloitte Forage | Link — Nov' 25
- Oracle Cloud Infrastructure 2025 Certified Networking Professional – Oracle| Link — Nov' 25
- Privacy and Security in Online Social Media – IIITH, NPTEL | Link — Apr' 25
- Introduction to Hardware and Operating Systems – IBM, Coursera | Link — Sep' 24

TECHNICAL SKILLS

- **Languages**: Java, C, C++, Python, Kotlin, HTML, CSS, JS
- **Operating system**: Windows (XP,7,8,10,11), Kali Linux, Ubuntu, Tails, Windows Server, Mac
- **Tools/Platforms**: Wireshark, Nmap, Burp Suit, Autopsy, Recon-ng, Active Directory, theHarvester, Git, Shodan Metasploit Framework, Maltego, Netcat, OpenVAS, John the Ripper, PEStudio
- **Soft Skills**: Ethical and Responsible Behavior, Communication, Time Management, Attention to Detail

EDUCATION

- Lovely Professional University — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; CGPA: 6.55 — Aug' 23 - Present
- Yashaswi PU Colle — Gauribidanur, Karnataka
  Intermediate; Percentage: 83.33% — Apr' 21 - Mar 23
- Adarsha Vidyalaya — Gauribidanur, Karnataka
  Matriculation; Percentage: 91.68% — Apr' 20 – Mar' 21
